

TINY C07

Latest technology in a small case.

a Look Solutions product

battery fog generator

small, quick, efficient

one-hand-operating

made in Germany

The **TINY C07** is the modified successor of the Tiny Compact. The design has been changed to improve the handling of the machine. The **TINY C07** is delivered in a carrying case.

Machine

The **TINY C07** is a handy, compact battery-driven fog generator. Its easy handling and quick start-up is outstanding.

With its warming up time of less than a second, its light weight (650 grams) and the small dimensions (L=244 x W=52 x H=54 mm), this machine is applicable in many fields of operation.

In the world of theater, film, TV- and photographers, musicals and special effects, air flow and air tightness testing – everywhere where fog is needed quickly and unobtrusively, the **TINY C07** is the perfect alternative to normal fog machines.

Technology

All components of the machine have been built into a small and robust housing.

Just like the **TINY F07**, the heart of this machine is a microprocessor which controls and supervises all important functions. This guarantees a continuous and safe running of the generator.

Because of an intelligent control mechanism the battery supplies energy only when necessary. Thus – and due to the internal Sleep-Mode – the fog time is greatly increased compared to other battery powered machines.

Operation

The **TINY C07** is ready to go immediately. The fluid tank, which is fitted to the housing, has to be filled with fluid – now the machine is ready to use. It can be started immediately and continuously without any warming up time.

With the internal battery you can produce up to 10 minutes of continuous output or up to 150 puffs of 5 sec.

The **TINY C07** can easily be triggered with one hand. The start button is placed in the lid of the machine and can be pressed with the thumb.

A special fluid ensures that dense fog is produced with the lowest of fluid consumption.

The vaporizer can be easily changed by the user on site.

Optional Control

The **TINY C07** can be optional controlled in the following ways:

With the DMX-converter "DMXit" the machine can be triggered via DMX 512.

With the timer "TIMEit" you can programme in the fogging time and the fog-free time.

The machine can also be triggered with a radio remote control.

Technical data

Procedure	vaporizing fog machine
Power requirement	70 Watt
Voltage	12 V battery
Warm up time	0.5 sec.
Fluid tank capacity	50 ml
Fluid consumption	2.3 ml/min. with continuous output
Continuous output with internal battery	10 min
Control	Startbutton Radio remote (Option) DMX 512 (Option) Timer (Option)
Temperature control	Microprocessor
Dimensions (L x W x H)	24.4 x 5.2 x 5.4 mm 9..60 x 2.04 x 2.12 in
Weight incl. battery	650 g/22.92 oz

Dimensions

Advantages

- Small dimensions, light weight
- Battery supplies energy only when necessary
- Warm up time less than 1 second
- Continuous output
- Lowest fluid consumption
- Easy handling
- Triggered with the start button or the optional radio remote, DMX-converter and timer
- Manufactured in Germany

Package includes

- TINY C07 with internal battery and fluid tank
- Charger
- 250 ml Fluid
- Carry Case

Accessories

- Radio remote
- Duct adaptor
- Y-Splitter
- Silicon hose ø 15 mm
- DMX converter
- Timer

Service

Based on the strong partnership with the German manufacturer OTTEC Technology GmbH, Look Solutions is able to provide a quick and easy service which guarantees the high quality of all products with the motto „innovation by communication“.
